31 nonoverlapping 1 s windows per excerpt; 3.75–29.2 km
Start 050 s
Start 140 s
Start 265 s
White-noise control: central 90%
Noise-like background relative to median (dB)
Doppler (Hz)
Exact white-noise information bound, on-bin target
Gain vs current window single cell (dB)
Complex Doppler cells processed jointly
hann
hamming
Hann full single-cell loss
Hamming full single-cell loss
